Sustainable development Goals of the Agenda 2030

Some Subgoals and indicators

SDG 6.6.1

Water-related ecosystems (could be used for Ramsar Convention on Wetlands \citep{Ramsar1971})

SDG 11.3.1

Ratio of land consumption rate to population growth rate. Training Module: Land Use Efficiency. United Nations Human Settlement Programme (UN-Habitat), Nairobi. UN-Habitat (2019) SDG

SDG13.1

Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries

SDG Indicator 13.1.2

Number of countries with national and local disaster risk reduction strategies

SDG 13.2

Integrate climate change measures into national policies, strategies and planning

SDG 13.3

Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning

SDG 15.3.1 indicators: productivity, land-cover and soil organic carbon

All 232 SDG Indicators: What data is available?

OurWorld in Data

This visualization shows for which of the 230 Sustainable Development Goals (SDGs) Indicators data is available at SDG-Tracker.org.

- = Indicators for which recent global official metrics are available, or for which alternative good-quality cross-country source are available (e.g. estimates from independent research institutes).
- = Indicators that do have official metrics, but for which available data is very incomplete or outdated.

 Yellow boxes also mark Indicators for which there are no official metrics, but for which closely related estimates are available that allow informative but imperfect monitoring.
- = Indicators for which to the best of our knowledge global monitoring is not currently possible.
